

Kreaturen ID's

Es können inzwischen auf drei verschiedene Arten Dinosaurier bzw. Kreaturen per Admincheat gespawnd werden.

Variante 1:

Code

1. admincheat summon <kreaturenid></kreaturenid>

Wenn ihr den "summon" Befehl nutzt, so spawned die ausgewählte [Kreatur](#) mit einem Random-[Level](#). Die jeweilige [Kreatur](#) spawned "in euch" und glitched anschließend ein Stück weit von euch weg. Bei Carnivoren ist hier besondere Vorsicht geboten da sie euch sofort attackieren werden. Führt den Befehl bei Carnivoren am besten immer mit den aktivierten Commands "god" und/oder "infinitestats" aus. Kreaturen, die über diesen Befehl gespawnd werden, sind **immer wild** und müssen anschließend entweder mit dem Befehl "cheat dotame" oder alternativ "cheat forcetame" gezähmt werden. Bei Flugtieren gestaltet sich diese Methode als schwierig da sie in der Regel sofort abheben und wegfliegen. Hier empfiehlt es sich den Befehl in geschlossenen Gebäuden durchzuführen.

Variante 2:

Code

1. admincheat SpawnDino <blueprintpfad> <distanz> <spawn-y-offset> <z-offset> <dinolevel></dinolevel></z-offset></spawn-y-offset></distanz></blueprintpfad>

Mit diesem Befehl könnt ihr eine bestimmte [Kreatur](#) mit einem von euch festgelegten [Level](#) spawnen. Wenn ihr also bspw. einen [Ankylo](#) mit [Level](#) 120 spawnen wollt, dann sieht das so aus:

Code

1. admincheat SpawnDino "Blueprint/Game/PrimalEarth/Dinos/Ankylo/Ankylo_Character_BP.Ankylo_Character_BP" 500 0 0 120

Der Wert 500 steht für die Distanz, die zwischen euch und der gespawnten [Kreatur](#) liegt. Der Abstand beträgt hierbei etwa 1-2 Foundations in die Richtung, in die ihr gerade schaut. Schaut dabei ein wenig höher und nicht direkt auf den Boden da dies wieder nur zur Folge haben kann, dass die [Kreatur](#) "in euch" spawned und anschließend wieder ein Stück weit von euch weg glitched. Auch hier gilt wie bereits bei dem obigen Befehl erklärt: Kreaturen, die über diesen Befehl gespawnd werden, sind immer wild und müssen anschließend entweder mit dem Befehl "cheat dotame" oder alternativ "cheat forcetame" gezähmt werden. Bei Flugtieren gestaltet sich diese Methode als schwierig da sie in der Regel sofort abheben und wegfliegen. Hier empfiehlt es sich den Befehl in geschlossenen Gebäuden durchzuführen.

Variante 3:

Code

1. admincheat gmsummon <"KreaturenID"> <dinolevel></dinolevel>

Dieser Befehl wurde mit Patch 252.4 eingeführt. Mit diesem Befehl spawned ihr ebenfalls eine [Kreatur](#) mit einem von euch gewählten [Level](#). Allerdings ist die [Kreatur](#) bei diesem Befehl **direkt gezähmt** und bekommt zusätzlich die maximale Anzahl an Bonuslevel gutgeschrieben, die ihr **während des Zähmvorgangs** erhalten könnt. Eine über diesen Befehl herbeigerufene [Kreatur](#) benötigt allerdings einen Sattel um geritten werden zu können.
